### Restriction Requirement

#### 35 U.S.C. § 121

RECEIVED  
NOV 19 2003  
TECH. CENTER 1500/2900

1. Acknowledgement is hereby made of receipt and entry of the communication filed 05 May, 2003. Applicants are hereby advised that the restriction requirement set forth in paper no. 6 is hereby vacated in view of the following requirement. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- a. Group I, claims 1-3, 8-14, 20-34, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising a **depo effect-inducing adjuvant** (e.g., alum) and a **CpG dinucleotide-based adjuvant**, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 44.
- b. Group II, claims 1, 4, 5, 8-14, 20-33, and 35, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising an **immune stimulating adjuvant** (e.g., MPL) and a **CpG dinucleotide-based adjuvant**, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 44.
- c. Group III, claims 1, 6-14, and 20-33, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising a **depo effect-inducing/immune stimulating adjuvant** (e.g., ISCOMs) and a **CpG dinucleotide-based adjuvant**, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 44.
- d. Group IV, claims 1-3 and 8-34, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising a **depo effect-inducing adjuvant** (e.g., alum) and a **modified CpG dinucleotide-based adjuvant**, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 48.
- e. Group V, claims 1, 4, 5, 8-33, and 35, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising an **immune stimulating adjuvant** (e.g., MPL) and a **modified CpG dinucleotide-based adjuvant**, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 48.
- f. Group VI, claims 1 and 6-33, drawn to a **method of inducing an antigen-specific immune response** through the administration of a composition comprising a **depo effect-inducing/immune stimulating**

adjuvant (e.g., ISCOMs) and a modified CpG dinucleotide-based adjuvant, classified in class 424, subclass 278.1, class 536, subclass 23.1, and class 514, subclass 48.

5        2. The inventions are distinct, each from the other because of the following reasons:

10        3. Inventions I-VI are each unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04 and § 808.01). In the instant case, each of the identified groups employs structurally and functionally disparate compositions (e.g., depo effect-inducing adjuvants such as alum, immune stimulating  
15        adjuvants such as MPL, dual acting adjuvants such as ISCOMs, CpG dinucleotide-based adjuvants, and phosphorothioate-modified CpG dinucleotide-based adjuvants). Since each of the identified groups employs different compositions, separate searches will also be required. Accordingly, each of the identified groups is clearly  
20        directed toward an independent and distinct invention.

25        Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and require separate searches, restriction for examination purposes as indicated is proper.

30        4. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143). Applicants are also advised that the claims should be amended to reflect the election, where necessary. If one of Groups IV-VI are selected, the claims should be amended to reflect the requirement for a modified CpG dinucleotide-containing adjuvant.

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(I).
